This 3 hours is a time we have put away for ourselves, and we are all enjoying the company, catching up with each other and learning something new. We have a teacher coming along nearly every week to help us and teach us lots of interesting ways of patchwork. The days our teacher is there we pay \$5.00 and if we are on our own, we put in \$1.00 towards tea & coffee and we will be able to start a library for our own use.

Try and come along and join in our fun, most of us when we started had no idea of how to do patchwork, but now we are steaming along, quite proud of ourselves! Everyone is welcome.

GARDENING IN JULY

Well, July is the middle of winter and there is plenty to do in the garden.

Rose and fruit trees can be planted and nurseries stock bare rooted deciduous flowering trees, fruit trees and roses, and this is the best time to plant them.

It is also time to start prune your existing roses and fruit trees too. You will need a good pair of secateurs and the best ones are those with good steel blades as they stay sharp and the blades will not get out of line. Before you prune your roses or trees, have hand a mixture of $\frac{3}{4}$ bleach and $\frac{1}{4}$ water to drip your secateurs into. This mixture will sterilize the blades and therefore reduce any disease travelling from plant to plant, doing this is like putting antiseptic on a cut on your own hand.

Remember to cut the middle of the tree out and the branches that are laying across each other or pointing inwards, this way the fruit will be on the outside of the tree and easy to get to.

Vegetables: there are not a lot of vegetables to sow now as the days are short and the nights are cold. You can sow broad beans, peas and all varieties of onions, rhubarb, strawberries and asparagus crowns.

Flowers: seedlings of stock, viola, primula, wallflower, russell lupins, delphiniums, foxglove, poppies, sweet william, calendula, alyssum, snapdragons, verbena, dianthus and sow the seed direct into the soil for Virginian stock which makes a lovely border.
